Akash Prajapati

Full-Stack Developer | Python, Django, React Native & React.js

Mumbai, Maharashtra, India | +91-8356886969 | akash.p8869@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Full-Stack Developer with 3.4+ years of experience building scalable web and mobile applications using Python, Django, Django REST Framework, React Native, React.js, and JavaScript. Experienced in developing REST APIs, microservices, reusable UI components, and frontend state management using Redux and Redux Toolkit. Strong understanding of database optimization, third-party integrations, authentication, payment gateways, and production support, with experience delivering enterprise applications across automotive and e-commerce domains.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL

Frontend Development: React.js, React Native, Redux, Redux Toolkit, React Hooks, HTML5, CSS3, React Router, Axios

Backend Development: Django, Django REST Framework, FastAPI, REST APIs, Microservices, Django ORM

Mobile Development: React Native, Android Studio, Xcode, Mobile SDK Integration, Maps, Charts, Reusable Components

Databases & Messaging: PostgreSQL, Redis, Apache Kafka, Celery

Authentication & Integrations: Keycloak, JWT, OAuth 2.0, OTP Verification, Payment Gateway Integration, Third-Party API Integration

Cloud & DevOps: AWS (S3, RDS, EC2, ELB), Docker, Kubernetes (Fundamentals), Grafana, Git, GitHub, Swagger/OpenAPI

Core Concepts: OOP, Database Design, Query Optimization, System Design, Agile Methodology, Production Support

PROFESSIONAL EXPERIENCE

Vishleshan Software Solutions Pvt. Ltd. | Software Developer

25th November 2025 – 24th September 2026

Edukaan — Tata Motors | Commercial Vehicle Spare Parts E-Commerce

- Developed 100+ REST APIs using Python, Django, and DRF for core e-commerce workflows on a platform handling 1,000+ orders daily.
- Implemented Smart Search using separate image and text embedding pipelines, enabling product discovery through images, part numbers, names, categories, and voice queries, with top-5 similarity-based results.
- Developed FastAPI notification services integrated with Apache Kafka, supporting approximately 1,000–10,000 notifications daily.
- Implemented Redis caching for Order History APIs and optimized Django ORM queries to reduce repeated database access and improve response times.
- Built asynchronous report and export workflows using Celery and Redis, integrating AWS S3 for file storage and secure presigned downloads.
- Developed DSR/MSR (Field Representative) business workflows and integrated Shiprocket for shipment creation and tracking, and SAP Grow with internal backend services.

PV Shopee — Tata Motors | Passenger Vehicle Spare Parts E-Commerce

- Integrated Keycloak authentication APIs for login and token-generation workflows using JWT and OAuth 2.0.
- Implemented CAPTCHA validation and supported backend maintenance and production issue resolution.

Sankey Solutions | Solution Analyst

1st June 2023 – 14th November 2025

FleetEdge — Tata Motors | IoT-Based Fleet Management Platform

- Developed backend features across vehicle, wrapper, subscription, and payment services within an approximately 18-microservice fleet management platform using Python, Django, and PostgreSQL.
- Developed 30+ mobile screens and 50+ reusable React Native components, optimizing UI development, reducing code redundancy, and improving application usability.
- Implemented Redux for application state management and used React Native Hooks, including useEffect, useMemo, useCallback, and useLayoutEffect, to manage component lifecycle and optimize rendering.
- Managed frontend-backend communication using Axios and Promises, including API integrations, request/response handling, and interceptors.
- Integrated Fleeca SDK and implemented mobile permissions, maps, charts, tooltips, and key application modules.
- Developed Mileage Saarathi and Driving Scorecard mobile modules to provide driving insights, vehicle performance metrics, and real-time tracking capabilities.
- Upgraded React Native from 0.68.1 to 0.70.1, resolving dependency conflicts and Android/iOS compatibility issues.
- Built the Vehicle Day-wise Tracker backend, processing historical GPS coordinates, calculating distances using the Haversine formula, identifying trips and stops, and preparing route data for Google Maps visualization.

- Designed and optimized backend services, improving API performance by approximately 20–30% by resolving N+1 query issues and optimizing database access using Django ORM Subquery and related query optimizations.
- Implemented role- and subscription-based access controls, managing Fleet Owner and Fleet Manager permissions, site-level vehicle visibility, and plan-based access.
- Integrated CCAvenue payment gateway with request encryption, response decryption, payment callbacks, status updates, subscription synchronization, and Redis cache updates.
- Developed vehicle subscription workflows for plan purchases, upgrades, renewals, and expiry.

IQMS — Intelligent Quality Management System | Tata Motors Passenger Vehicle Manufacturing

- Developed the User Portal backend using Python, Django, and PostgreSQL, covering database design and implementation of 50+ REST APIs to digitize paper-based vehicle assembly-line quality inspections.
- Implemented Quality Maker and Quality Checker workflows for inspection recording, defect reporting, corrective actions, and verification across assembly-line operations.
- Developed an Apache Kafka consumer to receive VIN and vehicle information from manufacturing sites and persist incoming data in PostgreSQL; integrated Swagger/OpenAPI documentation for API testing and frontend coordination.

EDUCATION

Bachelor of Engineering — Computer Engineering
Smt. Indira Gandhi Engineering College, University of Mumbai | Aug 2019 – Jun 2023 | CGPA: 8.88/10

ACHIEVEMENTS

- **Shining Star:** Recognized for outstanding technical contributions.
- **Bar Raiser:** Recognized for problem-solving, technical guidance, and supporting team members.

CERTIFICATIONS

- Machine Learning with Google Cloud
- Android Development

PUBLICATION

- Crop Protection Against Birds Using Deep Learning and IoT, IRJET, Vol. 10, Issue 4, April 2023.
